Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

RECIPROCAL NOTIFICATION.

Minnesota.

Cases of communicable diseases referred during April, 1917, to other State health departments by department of health of the State of Minnesota.

Disease and locality of notification.	Referred to health authority of—	Why referred.
Smallpox:		
Minneapolis Health Department, Hennepin, County.	Kansas City, Wyandotte County, Kans.	Arrived Minneapolis from Kansas City, with smallpox of weeks duration.
	Havre, Hill County, Mont.....	Patient broke out with smallpox 4 days after leaving Montana.
	Wishek, Grant County, N. Dak., superintendent Soo Line.	Patient arrived at Minneapolis from Wishek, N. Dak., via Soo Line, broken out with smallpox.
	Deadwood, Lawrence County, S. Dak., Rapid City, Pennington, County, S. Dak., Bellefourche, Butte County, S. Dak.	Traveling salesman broken out with smallpox on arrival in Minneapolis from South Dakota.
Tuberculosis:		
Mayo Clinic, Rochester, Olmsted County.	Auburn, Sangamon County, Ill.; Kewanee, Henry County, Ill.; Marshalltown, Marshall County, Iowa; Schaller, Sac County, Iowa; Dows, Wright County, Iowa; Crawfordsville, Montgomery County, Ind.; Reedpoint, Stillwater County, Mont.; Grand Forks, Grand Forks County, N. Dak.; Alcester, R. F. D. No. 2, Union County, S. Dak.; Portage, Columbia County, Wis.; Edmonton, Alberta, Canada; Ponteix, Saskatchewan, Canada.	5 advanced, 6 moderately advanced, 1 quiescent, cases left Mayo Clinic for homes.
Thomas Hospital, Minneapolis, Hennepin County.	Irwin, Shelby County, Iowa; Milnor, Sargent County, N. Dak.; Rhinelander, Oneida County, Wis.	1 far advanced and 2 fatal cases removed to homes from Thomas Hospital.
Typhoid fever:		
St. Hilaire, Pennington County.	Emerado, Grand Forks County, N. Dak.	Suspected typhoid fever case removed from Minnesota to home in North Dakota.

SPECIAL STATE REPORTS.

California Report for Week Ended May 12, 1917.

Measles still continues throughout the State. During the second week of May large numbers of cases were notified in Berkeley, Reedley, Los Angeles, Pasadena, San Diego, San Francisco, San Jose, Santa Clara, and Red Bluff. From the rural districts many cases were also reported, particularly in Shasta, Solano, Los Angeles, and Fresno Counties. Mumps became more prevalent during the week. The cities reporting its presence are Alameda, Lordsburg, Compton, Los Angeles, Riverside, Redlands, San Francisco, and San Diego. The distribution in rural communities is shown by the reports from Sonoma and Los Angeles Counties. Scarlet fever continues to be widely prevalent. Increases were shown in the reports from Oakland, Los Angeles, and San Francisco. The disease is also present

YOUR PATRIOTIC DUTY—BUY A 1917 LIBERTY BOND.

in Sonoma, Los Angeles, and Kern Counties. No cases of smallpox or poliomyelitis were reported during the week. Whooping cough showed a slight decrease. Of typhoid fever 11 cases were reported as follows: Four in Oakland, 1 in Colusa County, 1 in El Centro, 2 in Los Angeles, 2 in San Francisco, and 1 in Pasadena.

Preventable diseases reported in California during the week ended May 12, 1917.

Disease.	Cases reported.	Disease.	Cases reported.
Chicken pox	157	Mumps	281
